

Horizontal Wind Turbine Catalogue

Model: GH-30KW Horizontal axis wind turbine On-grid | Off-grid system

Overview

GREEF GH-30KW wind generator is the conversion of wind energy into mechanical energy first and electric energy afterwards. This equipment can fully make use of wind power to recharge a battery, and also can saved energy into ac source alternating current. Without the necessity of fuel, the GH-30KW wind generator is pollution free and far away from noise. The GH-30KW wind generator is generally applicable to the area which has good condition but is far away from the power grid, or the power grid is not normal. The GH-30KW generator can supply lighting, the television set, the searchlight, the communication equipment, the power tool and other household appliances.

Recommended for:

- Household,Garden,farm,Urban ,Rooftop
- Telecom sites.
- Rural electrification programs. Island , sentry, island, sight lighting
